SUMMARY

Senior Flutter Developer with 4+ years of experience building scalable mobile applications across SaaS, hospitality, government, and blockchain domains. Strong expertise in Flutter architecture, GraphQL integration, monorepo development, and CI/CD automation. Experienced in delivering production-ready applications published on the App Store and Google Play with a focus on maintainability, performance, and clean architecture.

Strong English reading & listening comprehension, with hands-on experience writing technical documentation in English. Actively leverages AI tools (ChatGPT, Gemini for research; Claude for custom development skills, MCP workflows, and Figma-to-code generation) to accelerate delivery.

EXPERIENCE

Senior Flutter Developer **April 2025 – Present**
Enosta — Da Nang

- Developed and maintained Smartos Admin, a production mobile application published on the App Store and Google Play (April 2025 – June 2026).
- Transitioned to independently lead development of Đại Thắng Holdings, a multi-tenant white-label investor portal, from architecture through release (June 2026 – Present).
- Contributed to building and improving the base project structure and development guidelines; identified technical risks early and proposed refactoring (module consolidation, dependency conflict resolution in Melos monorepo).
- Optimized build performance to improve development and release efficiency.
- Wrote project documentation and mentored team members during development.
- Participated in code reviews, dev testing against QA checklists, and sprint planning/estimation to ensure release quality.
- Collaborated with cross-functional teams to deliver product features.

Middle Flutter Developer **May 2024 – April 2025**
Revotech, MiraboTech

- Refactored legacy Flutter codebases and integrated updated libraries, enhancing scalability and improving user experience across platforms.
- Devised and deployed automated unit testing frameworks (flutter_test, Mockito), accelerating release cycles and improving reliability.
- Integrated RESTful APIs and managed state using BLoC architecture, reducing complexity while supporting real-time data synchronization.

Flutter Developer **April 2023 – May 2024**
ezCloud, Ha Noi

- Developed and maintained hotel management applications, implementing business features and optimizing performance.
- Collaborated with team members to improve maintainability and user experience.
- Fixed production issues and improved application stability.

Flutter Developer **2021 – 2023**
Synodus, Ha Noi

- Developed Flutter applications for blockchain and government domains.
- Implemented UI and integrated REST APIs, optimizing performance and fixing production issues.
- Collaborated with cross-functional teams in an Agile environment.

KEY PROJECTS

Smartos Admin — Enosta **April 2025 – June 2026**

- Production business management application published on the App Store and Google Play.
- Built and maintained a scalable Flutter architecture with reusable modules in a Monorepo (Melos) structure.
- Integrated GraphQL APIs, optimized data workflows, and implemented CI/CD automation for build and release.
- Optimized build performance to improve development and release efficiency.

Đại Thắng Holdings (Investor Portal) — Enosta, Solo Project **June 2026 – Present**

- Independently architected and built the mobile app (Flutter) for a production multi-tenant/white-label investor portal, from foundation to release v1.0.0 — solo ownership of the mobile client only (backend GraphQL services provided separately).
- Used Riverpod 3 (code-gen), integrated with 4 backend GraphQL services, go_router, and Firebase Remote Config with dynamic per-tenant branding.
- Engineered an AI-assisted development workflow with 20+ custom Claude Code skills/agents (Figma-to-Flutter code generation, GraphQL API scaffolding, automated UI/performance/device-matrix testing, documentation generation) to accelerate solo delivery.

- Set up encrypted secrets management and multi-environment CI/CD (dev/staging/prod) for build and release.
- Development complete; pending client approval for Google Play release and Apple unlisted-app review, targeting release on August 10, 2026.

ezCloudHotel Manager — ezCloud

April 2023 – May 2024

- Hotel management mobile application with business workflow management features and REST API integration.

MPI Vietnam — Synodus

January 2022 – March 2023

- Government application handling large-scale data, built on BLoC architecture.

DeFi For You — Synodus

April 2021 – December 2021

- Blockchain wallet and fintech application with Web3 integration and secure transaction workflows.

EDUCATION

Bachelor of Information Technology

2017

Tay Bac University — GPA: 3.3

SKILLS

Languages: Dart, Kotlin, JavaScript

Mobile Development: Flutter, BLoC, MVVM, Clean Architecture, Provider, GetX, RxDart

Native Mobile: Kotlin/Android (~8 months hands-on native experience)

APIs & Networking: REST API, GraphQL (Ferry), WebSocket, SignalR

Local Storage & Offline: SQLite, Hive, flutter_secure_storage, SharedPreferences

Backend & Services: Firebase (Cloud Messaging, Analytics, Crashlytics, Remote Config), NodeJS, NestJS, OneSignal, Web3

Testing: Unit Testing (flutter_test, Mockito)

DevOps & Tools: GitHub Actions, Fastlane, Monorepo, Melos, Git, Jira, Figma

AI-Assisted Development: ChatGPT & Gemini (research); Claude (custom skills, MCP workflows, Figma-to-UI code generation)

Frontend (self-taught): React

English: Strong reading & listening comprehension; writes technical documentation in English

Additional: CI/CD, App Performance Optimization, Code Review, Agile/Scrum, App Store & Google Play Deployment
